1.Introduction

The Government has ordered for the establishment of Eco Park at Adyar Creek and Estuary in Chennai in order to restore the wetlands with its unique fauna and native flora to bring back the original Adyar Creek in an total area of about 358 acres. The restoration of Adyar Creek in 58 acres (Phase I) have been completed during 2010.

In 2013, the Government through Chennai Rivers Restoration Trust proposes to take up the implementation of Phase II restoration activities in 300 acres of Adyar Creek and Estuary from Santhome cause way to Thiru.Vi.Ka.Bridge. Among the proposed interventions is clean-up by removing debris, plastics and sludge in the estuary and creek to improve the flood carrying capacity of the channel. The total volume of sludge/debris to be excavated is 1,77,880 Cubic meter. The composition of this sludge/debris is 92.7% of sand, 0.98% of silt and 6.31% of clay. The detailed soil report can be downloaded from www.tnuifsl.com/downloads.asp

2.Modus operandi

Chennai Rivers Restoration Trust proposes to invite tenders for the implementation of Phase II restoration activities in 300 acres of Adyar Creek and Estuary in the next two months and have appointed a Project Management Consultants (PMC) for the same.

The contractor identified for implementation of Phase II restoration activities in 300 acres of Adyar Creek and Estuary will remove the sludge/debris from the creek and will store it in indentified locations between Santhome Causeway and Thiru.Vi.Ka.Bridge.

The removing of sludge/debris activity in the Adyar Creek will be spread over a period of 12 months.During the monsoon season (October – December), the progress of the activity will be based on the intensity of the rains.

The firm appointed for sludge/debris transportation will be informed through e-mail/letter to take the excavated materials stacked by the CRRT in the Project site. Before leaving, the project site, the Project Management Consultants (PMC) will overlook the loading activities and the volume of sludge/debris moving out of the project site will be monitored along with vehicle entry exit.

3. Terms and Conditions.

The following are the terms and conditions the interested firms should oblige -

1. In case of more number firms being shortlisted, the volume of sludge / debris will be shared by CRRT at their discretion.
2. The Contractor is permitted to take only the excavated materials stacked by the CRRT in the Project site.
3. The Contractor shall follow the guidelines and norms stipulated by the concerned Statutory authorities during removal of materials, transportation and disposal.
4. The Contractor should obtain prior permission from the agencies or ULB for safer disposal at the designated places.
5. The contractor should not dump the excavated material in waterbodies/ rivers/waterways/wetlands.
6. The contractor should adhere to the traffic rules while transporting the excavated materials.
7. The submission of Expression of Interest does not guarantee that the work will be awarded to your firm.
8. All charges of loading, un-loading and transportation have to borne by the contractor and there should not be any cost or liability on CRRT of any kind.
9. The Project Management Consultants (PMC) will inspect the entry and exit of vehicles and the weight of the load before leaving the Adyar Creek permisison.
10. The availability of debris and sludge will be subject to the accumulation on the site and neither quantity nor volume can be guaranteed.
11. Though testing report is enclosed, the interested parties can take samples for ascertaining the composition for their satisfaction.
